Comments:

- (1) These figures are in east marks.
- (2) Actually the various items under lubricating oils total 4,700 tons, 1,557 thousand DM cost price and 7.78 thousand DM cost premium. These totals, rather than the ones given in the report, are probably correct.
- (3) This total is larger than the total of the various items under it. Apparently one item has been omitted.
- (4) The figures in the various columns do not check with one another.
- (5) The actual totals of the figures in these columns is 567,100 tons, 73,909 thousand DM cost price, and 657.98 thousand DM cost premium. However, if the lubricating oils totals were reduced to the actual totals of the various sub-items (see Comment (2)), then the grand totals would be those indicated in the report.
